

TPG200

- Stand Alone Functionality
- Measures Tread in THREE places
- Send data to TPMS Desktop
- Works with Point of Sale
- Rechargeable Battery
- Charging Cradle Included

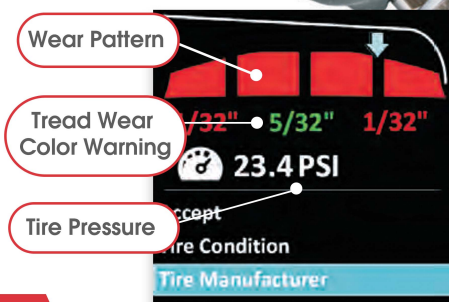

The TPG200 is our mid-range tread depth and tire pressure gauge with Bluetooth data transfer.

This rugged tool measures the tire in three places, easily showing the profile as well as tread depth.

The TPG200 also measures tire pressure with the detachable air chuck and hose, included with the tool.

The sunlight-readable display shows all the important information. Once the tires are tested, send the data wirelessly to the computer for use in TPMS Desktop using the Bluetooth radio.

Because the TPG200 displays the tire profile, it is now easier to inform customers about other safety issues, such as front end alignment and uneven wear patterns.

BENEFITS

- ✓ Sunlight-readable display
- ✓ Made to withstand daily use in a tire/repair shop
- ✓ Accuracy - Pressure ± 1 psi, Tread Depth $\pm .004$ "
- ✓ Send tire data to your computer
- ✓ Consumer-friendly Inspection Report (Sell more tires!)
- ✓ Light up the workspace for faster service
- ✓ Increased durability with no hard connection failures
- ✓ Easy replacement and storage

FEATURES

- ✓ High-resolution display
- ✓ Protective rubber boot
- ✓ Accurate measuring of tread and pressure
- ✓ Wireless Bluetooth data transfer
- ✓ Integrates with TPMS Desktop
- ✓ Integrated LED flashlight
- ✓ Wireless inductive charging
- ✓ Quick-disconnect air hose
