

# TECH550<sub>PRO</sub>

The Tech550 is the latest evolution of TPMS tool from Bartec.

Combining the Icon Based Menu from the Tech600Pro and the wired OBDII connection of the TechPro450, the Tech550Pro provides high powered TPMS diagnostic service while maintaining its mid-range price point.

The Tech550Pro offers features and benefits to make your shop more efficient. Except for the traditional OBDII cable to the vehicle, the Tech550Pro is a wireless TPMS, wireless charging, wireless data transfer (Bluetooth) and wireless updating (WiFi).
